

SEVENS REPORT

alpha

April 21, 2020

In Today's Issue

- **What To Buy, Part 3: Sub-Indices That Should Be Long -Term Beneficiaries from the Coronavirus Experience.**
- Each part of our "What To Buy" series have become more granular. Part 1 focused on broad sectors. Part 2 identified larger industries that should benefit over the longer term from changes in behavior from the coronavirus experience. **Now, Part 3 will go even deeper and rely on our own anecdotal experiences to identify sub-indices that should benefit over the longer term from changes in business behavior in a post-coronavirus world.**
- **Idea 1: Cloud Computing. SKYY (First Trust Cloud Computing ETF).** Many small businesses have been forced to seriously upgrade their online presence, and that's likely to continue after the coronavirus has passed. Cloud computing companies stand to benefit from this increased demand.
- **Idea 2: E-Commerce: SHOP (Shopify) & GDDY (GoDaddy).** Thousands of smaller retailers that rely on local foot traffic have had to quickly pivot to online sales, and SHOP and GDDY should be two long-term beneficiaries of this pivot.
- **Idea 3: Online Payment Processing: IPAY (ETFMG Prime Mobile Payments ETF).** Setting up an online store is one thing, but there has to be a backend payment processor to accept the payment. IPAY gives us a "pure play" on that backend infrastructure that's sure to see increased demand post coronavirus.

Coronavirus Tailwind Trends, Part III

The impact of aggressive government intervention and federal stimulus packages brought on by the coronavirus economic shutdown has led to an impressive rally in the major domestic equity benchmarks.

For example, the S&P 500 Index lost 1200 points from high to low this year, but it has come roaring back to recover more than half of those losses. So, right now this market can be described as one that's "stuck in the middle."

This middle-ground market has many investment pros trying to figure out what comes next. And an admittedly unscientific eyeball survey of analysts parading themselves on CNBC and Fox Business now appears to show a split among those who think the lows are in, and those who are convinced we are due for another wave of high-intensity selling.

Whatever camp you find yourself in, there is likely to be further volatility ahead as COVID-19 headlines continue to be the primary drivers of daily market swings. And, what we don't know yet is how this sudden screeching halt in social activity and consumer behavior will impact earnings on Wall Street bellwethers. Further guidance in the weeks ahead should provide clarity into which businesses are designed to withstand this type of environment, and which are going to find themselves hurting for the foreseeable future.

What my research team and I have focused on over the past couple of weeks is how this black swan event is impacting local businesses and consumers.

I think we are all in agreement that this event is going to usher in a "new normal" in how businesses interact with their customers, direct their capital spending and insulate their revenue streams from future calamity.

Let me give you an example of a business I have personal knowledge of. There is a high-end clothing store my wife and I frequent in our hometown. Their entire business model is built around direct interaction with customers and familiarity of every-

one that walks through the door. They know your tastes, your size, and your spending history because they have cultivated a sales process built around customization and excellent personal service. During the fall football season, customers will come in and “hang out” in the store and watch the games—it’s that kind of a small-town place, and it does very well.

However, they have very little online presence, and they don’t do any online sales. They have mostly let their customers run the show on Facebook and Yelp reviews, but the bottom line is that their entire business is local. It’s also, however, a costly business to operate in terms of labor, as the store is well-staffed with expert sales associates.

Yet in this social distancing environment, the store’s been immediately devastated. Its previously healthy business, through no direct fault of its own, has seen revenue come to an abrupt halt. Well, we know there are millions of other businesses around the country in this same predicament.

My initial analysis of this situation is that when business owners come out on the other side of this environment, they aren’t going to make the same mistakes twice. **They are going to push heavily towards an online and e-commerce presence; sales diversification, automation, and the ability to reach customers outside of their local markets. They are going to invest more in cloud-based retail platforms, electronic payment processing, and distributed shipping.**

I also spoke with a friend on the West Coast that operates a major catering company. They did \$30 million in sales last year, almost all of it handled by personal interactions between customers and sales representatives. You can’t go to their website and order a wedding or a banquet in a tidy shopping cart. However, when the crisis hit, they had to immediately furlough the majority of their full-time staff. **The first order of business to survive there-after was to build an e-commerce platform for customers to purchase family meals and provisions.**

That move is allowing them to stay afloat during this uncertain period, and to provide an essential service to their community. They also plan on keeping their e-commerce platform as an active part of their business when conditions begin to improve. Why? Because it’s cheap to operate, it reduces labor costs, provides daily cash flow, and their efforts spread virally through social media.

The commonality among these stories is that companies that have neglected an online, e-commerce and remote workplace infrastructure are going to quickly recognize the benefits of partnering with best-of-breed online platforms and marketplaces. They are going to leverage the power of social media in their marketing efforts and they are going to invest in security to ensure these platforms stay operational.

This will be the “new normal” that small businesses and their customers rely on to stay connected now and in the future. It’s also a tremendous opportunity for your client portfolios to invest in a trend of technology, financial transactions, and sales channels that will ride the wave of this enhanced demand.

Investment Idea 1: Cloud Computing & Cyber Security

We briefly touched on the attractive aspects of cloud computing in our prior issue as more employees engage in work-from-home practices. It’s our belief that this segment of the technology sphere will continue to expand at a blistering pace in the coming years and several data sets support that narrative.

Research firm Gartner Inc predicted last year that worldwide public cloud computing revenue would soar 17% in 2020 to \$266 billion. That number is expected to grow another 33% to \$354.6 billion by 2022, and those numbers were forecasted *before* coronavirus! ([source](#))

There are several pure-play funds designed to capture that growth in a diversified manner by owning a basket of stocks dedicated to software, infrastruc-

ture, and remote workplace services. The largest and most well-established of this group is the **First Trust Cloud Computing ETF (SKYY)**. This \$2.2 billion ETF contains exposure to 60 technology stocks selected and weighted according to a methodology that is unique to the industry.

The underlying holdings in SKYY must be categorized as cloud computing by the Consumer Technology Association and meet strict criteria for minimum size and daily trading volume.

Individual holdings are then given a score based on the categories Software-as-a-service, Infrastructure-as-a-service, and Platform-as-a-service. The scores then help determine the weight of each company within the index at each quarterly rebalancing date with a maximum cap of 4.50%.

The result is a highly diverse, liquid, and low-cost portfolio of cloud computing stocks with many well-known names. Amazon, Microsoft, Oracle, Alphabet, and VMware currently round out the top five holdings as of the latest index data. What's fundamentally attractive about this fund is that you get a mix of three major cloud silos in one vehicle. You get the infrastructure providers such as Amazon and Microsoft alongside the security companies such as Zscaler and Citrix Systems. Furthermore, the application providers such as Salesforce, DocuSign, and Adobe all are represented as well.

This well-balanced mix has SKYY aptly positioned to be one of the beneficiaries of the heavy migration to cloud services. It also sports an expense ratio of 0.60%, which makes for an affordable tactical industry ETF to supplement your existing core equity exposure.

The chart here shows that the fund underwent a similar correction as the overall technology space since the February peak, and has subsequently regained much of its decline. It's likely

that these stocks continue to act in concert with the broad market through the remainder of the year as we receive news (good or bad) on the economic ramifications of the COVID- crisis. The real tailwind will come during the long-term recovery phase as we expect this to be an alpha-producing area of the next bull market.

It's worth mentioning the landscape of competing funds in this industry as well. The next largest ETF in this class is the **Global X Cloud Computing ETF (CLOU)** with \$400 million in total assets. It just celebrated its first anniversary and thus does not have the same historical track record as its larger peer.

CLOU is constructed with approximately 35 stocks as compiled by the Indxx Global Cloud Computing Index. The individual weightings behind each stock seem to favor high growth companies such as Zscaler, Shopify, and Digital Realty Trust. It also

First Trust Cloud Computing ETF (SKYY)

Inception Date:	5/27/2011
Assets:	\$2.8B
Avg Daily Volume:	542K
Expense Ratio:	0.60%
# of Holdings:	62
YTD Return:	0.75%
3-Yr Return:	61.56%
Mstar Rating:	3 Star

charges a slightly higher expense ratio than SKYY at 0.68%.

From a comparative standpoint, CLOU emphasizes smaller companies with a narrower subsection of the cloud industry represented in its holdings. It also contains exposure to real estate investment trusts (REITs) engaged in the server operations field that differentiates it from SKYY. This is likely to lead to varying degrees of performance and volatility between the two funds over longer periods.

In this environment, my preference would be to lean towards the higher-quality, lower-cost option in SKYY as a first choice. Those clients with a little more risk tolerance or who want to really emphasize this theme in their portfolios may want to look at CLOU or even owning both ETFs to create a more aggressive footprint.

We would also be remiss in failing to highlight a brand-new upstart in this field. Dan Ives, of Wedbush Securities (who we mentioned in the last issue), partnered with ETFMG to launch a new cloud-based ETF. Its moniker is the **Wedbush ETFMG Global Cloud Technology ETF (IVES)**.

IVES is designed to capture the mid-cap, work-from-home stocks that are expected to explode over the next decade. It takes a differentiated approach by having only 50% of the portfolio allocated domestically with the remaining assets spread among foreign stocks in foreign developed countries. Its portfolio is far different than that of SKYY or CLOU in both stock selection and allocation.

It's far too early to weigh in on the efficacy of this strategy, but with the brand weight behind Dan Ives, I wouldn't count it out. IVES is an ETF that we will be watching in the cloud computing industry as it develops a discernible track record under its new methodology.

ETF Nerd Alert: IVES was created by assuming the structure and assets of the ETFMG Drone Economy Strategy ETF (IFLY), which is why it has a track record associated with it. The changeover was officially announced and implemented on April 7. They essen-

tially borrowed the shell of a fund that had minimal assets and re-launched it as a cloud computing index. This method has been used by smaller ETF issuers in the past to increase the speed of adoption and reduce legal/regulatory costs.

Investment Idea 2: E-Commerce

E-commerce is not a new concept, but like my anecdotal observations in the introduction, there is now a tremendous need for every business that produces or sells tangible goods to have this function as part of their sales channels. No longer can a business rely strictly on brick-and-mortar retail or direct consumer interaction to support its revenue stream. It's too easy for the physical customers to disappear in the event of another health crisis, natural disaster, or other unforeseen global event.

Our natural inclination is to search out the ETF universe for a suitable candidate that would fit well in your client portfolios. However, in this instance, there is a weak field of options that we can't responsibly recommend. Several come up in online queries such as the Global X E-Commerce ETF (EBIZ), Franklin Disruptive Commerce ETF (BUYZ), and ProShares Online Retail ETF (ONLN). All of which have little AUM, short windows of trading history, and could potentially close if their sponsors deem them too expensive to continue operations.

What we can glean from these unproven funds is what some of the top stocks are in the e-commerce industry. We let the asset managers and index maven do the work for us so that you can present to your clients the cream of the crop in alpha-producing solutions.

In this environment, many small- and medium-sized companies are going to be looking to bolt on an e-commerce solution to their existing websites or build one from scratch. That's where brands such as **Shopify (SHOP)** and **GoDaddy Inc (GDDY)** come in.

Shopify is the biggest pure play on this theme because its platform allows users to create a functional online store in minutes. It even integrates merchant processing functionality, web design, encryp-

tion, and other features that customers have come to expect from their online shopping partners. It's an end-to-end solution that allows even novice users to craft a desirable and safe destination for their customers to purchase products.

SHOP is a \$48 billion market cap company that has seen its sales growth explode over the last five years. They went from \$205 million in revenue in 2015 to \$1.58 billion in 2019. My expectation is that this sharp growth pattern will only continue to accelerate even further in the years ahead. While net income has yet to turn positive, Shopify continues to invest in its growth with the expectation of profits down the road.

Just look at how Shopify has outperformed over the last three years. The stock has rocketed nearly 725% versus a gain of just 22.73% for the S&P 500.

Our other top e-commerce pick, GoDaddy, is where businesses will likely turn when they are truly starting from scratch. As the world's largest domain registrar, this publicly traded web company specializes in website hosting, email delivery, e-commerce, security, backup, and a wide range of other resources. It's a one-stop-shop for those that need an entire bundle of web services from a single provider with a long business history.

This \$11 billion market cap stock did \$3 billion in revenue last year and turned a tidy profit on its diverse business model. Additionally, its stock price

has continued to outpace the domestic benchmark by a wide margin on a three-year look-back.

This combination of SHOP and GDDY make for a formidable e-commerce and web hosting platform that can bolster your exposure to this theme

in your client portfolios.

As individual stocks with industry-specific business risks, we typically recommend smaller allocation sizes than you would utilize in a diversified ETF. That way you are able to ride the tailwind of this sector without overexposing your asset mix to enhanced volatility.

Lastly, we realize that online product sales do not operate in a vacuum with only a self-created web

store. Many producers also contract with distributor marketplaces such as Amazon, Walmart, Etsy, and eBay.

These companies give third-party sellers the capability to list their tangible products and sell through established

distribution channels by taking a cut of the revenue. It's an enticing proposition to reach a far wider audience, especially if you have a niche product that is easily deliverable on a national scale.

All of these companies feature prominently in many of the internet and technology funds we have recommended in the past. Moreover, it's likely that you already own a fair amount of these stocks in your existing exposure and wouldn't need to supplement further.

Investment Idea

3: Payment Processing and Cash-Less Transactions

Some of you may be tired of me beating the drum on payment processors as the next wave of financial innovators. However, every time

I look at this sector, I get more excited about the dynamics in play for online transactions and cash-less payments.

Even the CDC and WHO say cash is dirty and should be avoided! ([source](#)). I know that's what I immediately think of when I open my wallet to purchase something and have to decide between cash or card.

Contactless payments, online credit card transactions, and peer-to-peer money transfer are the wave of the future, and I encourage everyone to consider this the new, must-own financial sector. A brief reminder of our favorite play on this industry is the venerable **ETFMG Prime Mobile Payments ETF (IPAY)**.

This unique financial sector fund is one that is latching on to the online and mobile payment revolution with exciting results. It owns 39 primarily large-cap stocks such as PayPal, Visa, Mastercard, Square Inc, Global Payments Inc, and American Express.

These stocks are at the forefront of the e-commerce revolution, which has continued to expand at a breakneck pace. Furthermore, it's likely that consumers will ramp up their online spending trends to even greater heights in the midst of social

distancing and other isolation recommendations by federal, state, and local governments. These stocks are aptly poised to take advantage of this dynamic, and to capitalize on digital revenue streams already in place.

IPAY will celebrate its fifth anniversary

this year and has over \$550 million in assets under management. This niche ETF charges an expense ratio of 0.75%, which is a little on the high side for an industry fund in today's market, but worth the price of admission if it performs as it has over the last several years.

The chart here of IPAY shows it crushing its sector benchmark, the Financial Select Sector SPDR (XLF), over the past three years.

ETFMG Prime Mobile Payments ETF (IPAY)

Inception Date:	7/16/2015
Assets:	\$520.5M
Avg Daily Volume:	269K
Expense Ratio:	0.75%
# of Holdings:	40
YTD Return:	-17.94%
3-Yr Return:	48.01%
Mstar Rating:	N/A

What I like most about IPAY is that it is geared towards the next generation of growth in the financial sector rather than being beholden to traditional value-oriented banks or insurance companies.

The fund straddles the line between financials and technology like no other diversified investment vehicle. This ETF has the platform and current economic tailwind to exceed expectations as the

recovery phase takes hold.

Conclusion

In my opinion, the dust has not completely settled on the trickle-down effects from this economic calamity, and there are going to be opportunities to purchase many of these stocks or ETFs at generational price discounts.

So, it is therefore imperative that you do your due diligence in these areas now and start speaking with clients about the aftereffects that will lead to even greater profits down the road.

We are committed to sharing these themes with you and shaping portfolio decisions with a responsible message that you can relay and implement with effective results.

Best,

Tom

<u>Fund/Stock</u>	<u>Strategy</u>	<u>Date</u>	<u>Total Return</u>	<u>Benchmark Performance Since Issue Date</u>
<u>Cash Alpha</u> FPNIX (FPA New Income)	<p>FPNIX has generated positive returns for 33 straight years. No other non-government bond fund can boast of an equivalent track record. We also featured "MaxMyInterest," which produces 140 to 150 basis points of alpha versus traditional cash vehicles (MMAs, MMFs, and CDs). Max also increases FDIC insurance and can give advisors visibility to held-away cash.</p> <p>What to do now: Buy (Max is also an excellent cash management solution).</p>	<p>Issue 15: 3/6/18</p>	<p>FPNIX: 5.38%</p>	<p>BIL: 4.00%</p>
<u>Index Rebal</u> KBA (KraneShares Bosera MSCI China A Share ETF)	<p>KBA is an index rebalance play based on the inclusion of Mainland Chinese equities (A-shares) into MSCI Global Standard Indexes. The first two steps will take place on June 1st and September 1st. KBA is our gateway to front-run massive index funds that will be forced to buy its underlying holdings.</p> <p>What to do now: Buy.</p>	<p>Issue 16: 3/20/18</p>	<p>KBA: -10.03%</p>	<p>ACWX: -17.72%</p>
<u>Anti-Trade War</u> QABA (First Trust Nasdaq ABA Community Bank Index Fund)	<p>QABA is a play to protect against trade war ramifications (97% of its sales are U.S.-sourced). Additionally, it should also be a beneficiary of U.S. tax reform, in that, smaller U.S. companies should capture most of the 35% to 21% corporate tax cut. We also featured three more ETFs (AMCA, AIRR, KRE) and two exclusive stock screens—run through Cap IQ—for advisors to share with clients who have trade war concerns.</p> <p>What to do now: Buy.</p>	<p>Issue 18: 4/17/18</p>	<p>QABA: -35.80%</p>	<p>SPY: 8.57%</p>
<u>Foreign Small Caps</u> VSS (Vanguard FTSE All-World ex-US Small-Cap ETF) DLS (WisdomTree International Small-Cap Dividend Fund)	<p>Most advisors don't allocate to international small caps. But, we think they should reconsider. This hidden asset class holds several advantages over its U.S. equivalents: cheaper valuations, less volatility, lower correlations, higher dividend yields, and past outperformance. We highlight multiple individual ETFs, ETF combinations, and actively-managed mutual funds that do the trick.</p> <p>What to do now: Buy.</p>	<p>Issue 19: 5/1/18</p>	<p>VSS: -25.95%</p> <p>DLS: -30.25%</p>	<p>EFA: -16.86%</p>
<u>Disruptive Innovation</u> ARKK (ARK Innovation ETF)	<p>Investing in the "cornerstone themes of disruptive innovation" has resulted in huge profits over time (think Amazon, Apple, and Netflix). ARK sees current investment opportunities in innovation platforms, such as automation, energy storage, DNA sequencing, next generation internet, blockchain technology, etc. ARK's top innovation-based themes are all represented in ARKK. In 2017, ARKK was the #1 performing ETF (excluding leveraged and inverse ETFs) with a return of 87%!</p> <p>What to do now: Buy.</p>	<p>Issue 20: 5/15/18</p>	<p>ARKK: 27.67%</p>	<p>SPY: 8.25%</p>
<u>Buybacks</u> PKW (Invesco Buy-Back Achievers ETF)	<p>Companies with meaningful share count reduction have outperformed over the long term with lower volatility. Currently, U.S. companies are flush with cash due to tax cuts and repatriation. In turn, share repurchases broke a new record in Q1 2018 and they're on pace to set a new record for 2018. PKW is the premier ETF to profit from buybacks (largest asset base and longest history). We also featured four alternative ETFs (SPYB, TTFS, DIVB, SYLD) and some individual stock lists.</p> <p>What to do now: Buy.</p>	<p>Issue 21: 5/29/18</p>	<p>PKW: -4.48%</p>	<p>SPY: 9.01%</p>
<u>"FANG and Friends" of Emerging Markets</u> EMQQ (Emerging Markets Internet & Ecommerce ETF)	<p>"By 2025, annual consumption in emerging markets will reach \$30 trillion—the biggest growth opportunity in the history of capitalism."—McKinsey & Company. The combination of four major forces in emerging markets make this a great investment setup: favorable demographics, increasing smartphone availability, surging wireless broadband and Wifi access, and the globalization of the capital formation process. EMQQ is the best ETF to invest in this great confluence. We also featured three alternative ETFs (ECON, KWEB, KEMQ).</p> <p>What to do now: Buy.</p>	<p>Issue 23: 6/26/18</p>	<p>EMQQ: -13.40%</p>	<p>EEM: -3.83%</p>

<u>Outperforming in A Declining Dollar Environment</u> VGT (Vanguard Information Technology ETF) IHI (iShares U.S. Medical Devices ETF) EMLC (VanEck Vectors J.P. Morgan EM Local Currency Bond ETF) PDBC (Invesco Optimum Yield Diversified Commodity Strategy No K-1 ETF)	<p>If there's going to be a global deflation, then it will likely come with a weaker U.S. Dollar. From early 2017 through early 2018 the dollar declined from over 100 to below 90 (so more than 10%) and that had a significant impact on stocks:</p> <p>The 2017 decline in the dollar resulted in a 31% gain for the S&P 500 from December 2016 through January 2018.</p> <p>But, the dollar decline also created opportunities for specific sectors and assets classes to handily outperform the S&P 500, and we want to identify those opportunities in three strategies:</p> <ul style="list-style-type: none"> Targeted sector exposure via a focus on U.S. Exporters International ETF Exposure Commodities Allocations. 	11/5/19	Various ETFs Listed in the Issue	
<u>Closed End Funds</u> ETG (EV Tax Adv. Global Dividend Inc) HTD (JH Tax-Advantaged Dividend Inc) PDI (PIMCO Dynamic Income) NZF (Nuveen Municipal Credit Income) FFC (Flaherty & Crumrine Preferred & Income Sec.) RQI (Cohen & Steers Quality Income)	<p>Closed End Funds (CEFs) are under-utilized compared to ETFs (we explain why in the issue) but CEFs have advantages over ETFs both on a yield and tactical basis – and we think that CEFs can be an effective tool, when integrated into a broader portfolio strategy, that can boost yield and create opportunities to generate alpha.</p>	12/3/19	ETG: -23.30% HTD: -30.24% PDI: -30.21% NZF: -12.06% FFC: -12.44% RQI: -32.56%	SPY: -7.81%
<u>Cash Management</u> FPNIX (FPA New Income Fund) MINT (PIMCO Enhanced Maturity Active ETF) BBBIX (BBH Limited Duration I)	<p>In this issue, we identify three funds that provide market-beating returns on cash with very low duration and good liquidity, and we rank them depending on preference: More aggressive (and higher yield), Conservative, and “In Between.”</p>	12/17/19	BBBIX: -1.96%	BIL: 0.49%
