

SEVENS REPORT

alpha

February 23, 2022

In Today's Issue

- Many analysts (including me) are concerned about numerous headwinds hitting the U.S. markets and a potentially volatile trading year. That opinion has been correct and it's well reasoned. But it's also a very popular view on the Street right now. So, in today's issue we identify a playbook to outperform if, simply speaking, everything works out great!
- **Investment Idea 1: Tech Makes A Comeback. SPDR FactSet Innovative Technology ETF (XITK).** XITK is an equal-weight ETF that owns 100 stocks from the technology and electronic media sector and has a strong "growth" tilt. XITK has fallen nearly 40% from the highs but now sports a combined P/E of just 33x (which is low for a growth fund).
- **Investment Idea 2: Consumer Discretionary. Vanguard Consumer Discretionary ETF (VCR).** If inflation peaks and wage growth continues to expand, it stands to reason that consumer discretionary spending will be the beneficiary of this ostensible gap. VCR is a low-cost, broad ETF of over 300 consumer stocks that should outperform if consumer spending stays strong.
- **Investment Idea 3: High-Yield Bonds. iShares Broad USD High Yield Corporate Bond ETF (USHY).** USHY sports a dividend yield of 5.30% which is roughly 20% higher yield than HYG at today's levels and has an average duration of just four years.
- **Investment Idea 4: Senior Loans. SPDR Blackstone Senior Loan ETF (SRLN).** SRLN contains over 400 senior loan securities with floating rate components that achieve a dividend yield of 4.49%.

2022 Contrarian Sentiment Playbook

The investment narrative for 2022 has been largely written by a cadre of market forecasters that are advising caution in the face of many evolving economic forces. The consensus outlook this year is that the Federal Reserve is going to incrementally raise interest rates at least twice, but possibly as many as three, four, or even five times.

That policy change is being driven primarily by inflationary metrics that are running hotter than they have in decades with no alleviation in sight. That is ultimately going to create above-average stock market volatility in the form of sharp drops and uncertain advances. Throw in the outlier of a pernicious geopolitical event (e.g. the Russia/Ukraine conflict) and you have many advisors holding their breath with anxiety.

Some of these commonly held assumptions would lead to the following outcomes:

- Value stocks outperform growth stocks.
- Long- and intermediate-term bonds are going to incrementally deteriorate as interest rates rise.
- Commodities do well as inflation trends higher.
- Unconventional assets such as cryptocurrencies are likely to get swept up in added volatility.
- Real estate stays hot as inflation and supply constraints work to bolster prices.

The playbook is then to shift more of the portfolio to value stocks, shorten the duration of your bond sleeve, own a slice of diversified commodities, and have some cash on the sidelines for opportunistic purchases. If that sounds familiar, it's because you have probably heard it in one form or another in your absorption of daily media/research, including in the *Sevens Report*.

The narrative is logical, particularly in this stage of the economic cycle. One factor that links to the next factor and creates a linear sequence of events. Our brains latch on to these scenarios because they construct a steadfast picture that just makes sense.

That exact outcome may well come to pass, and we have been actively encouraging advisors for some time to be positioned in this manner. That's because the market trends have been signaling for this type of environment and we want to be positioned to take advantage of it. Those that have taken this road are likely very pleased with their relative performance over the last six to nine months.

However, there is an outcome that we believe many investors aren't considering this year, and it is one we are dubbing the "Contrarian Sentiment Scenario."

Have you sat back recently and asked yourself: What if everything works out great? What if the Fed absolutely nails the line between too hawkish and too dovish? What if inflation peaks and then recedes? What if corporate profits exceed expectations? What if consumer spending and jobs data stay hot? What if there aren't any substantially negative geopolitical events? What a wonderful world this would be!

Under this "best-case scenario" we would be looking at an entirely different set of market forces that would setup a new array of investment opportunities. It's this intriguing paradox that we want to prepare you for in this issue, so that you are loaded with tools to participate in the event this contrarian sentiment scenario unfolds.

Investment Idea 1: Tech Makes A Comeback

There is no doubt that you have been monitoring the developments of high-growth technology stocks over the last several months as prices have plummeted from lofty heights. This period is likely to go down as one of the more significant corrections for growth-oriented companies in the last decade. Part of the problem is that stock prices had far surpassed any reasonable valuation metrics with traders focused more on momentum than any other significant factor. Now those stocks are undergoing an extreme repricing event.

Software and internet services companies have been the hardest hit over this period as investors

have worried that flagging subscriber growth and rising rates would curtail profitability. Even the venerable Meta Platforms (FB) was unable to escape the wrath of risk aversion with the stock now off more than 40% from its all-time highs. And its one-day, \$250-billion market capitalization wipeout currently ranks as the worst trading day for a public company in the history of the stock market.

There are many reasons to actively avoid these stocks due to their pernicious downtrends right now. Nevertheless, it also warrants evaluation that high-growth tech has always managed to create meaningful alpha during every Goldilocks period of stock market expansion in recent memory. If the economic best-case scenario unfolds, then we are likely to see these stocks come roaring back in a way that once again attracts risk-seeking behavior among global money flows.

There are a couple of different ways that advisors can play this type of recovery in the software and tech sector based on client objectives and portfolio constraints. The first method is to seek out companies that have experienced the deepest selloffs with the expectation that they will spring back with aplomb.

One fund that fits this descriptor perfectly is the **SPDR FactSet Innovative Technology ETF (XITK)**. This index fund from State Street owns 100 stocks from within the technology and electronic media sector that demonstrate qualities of leading-edge products or services. Its highly diversified portfolio combines stocks such as Twitter, Spotify, Zillow, Roku, and DocuSign with large-cap mainstays that include Alphabet, Meta Platforms, and Nvidia Corp.

Best of all, the companies owned by XITK are equal weighted so that smaller stocks still have a meaningful impact on the total return of the fund. It charges a net expense ratio of 0.45% and currently has \$195 million in total assets.

Since peaking approximately one year ago, XITK has fallen nearly 40% and just recently hit new 52-week lows in January. The high-growth stocks that make up this portfolio have seen their share prices deteri-

orate, but also fundamentals now have fallen back in line to coincide with reasonable valuations. The fund now sports a combined P/E of 33x and a weighted average market cap of \$46 billion.

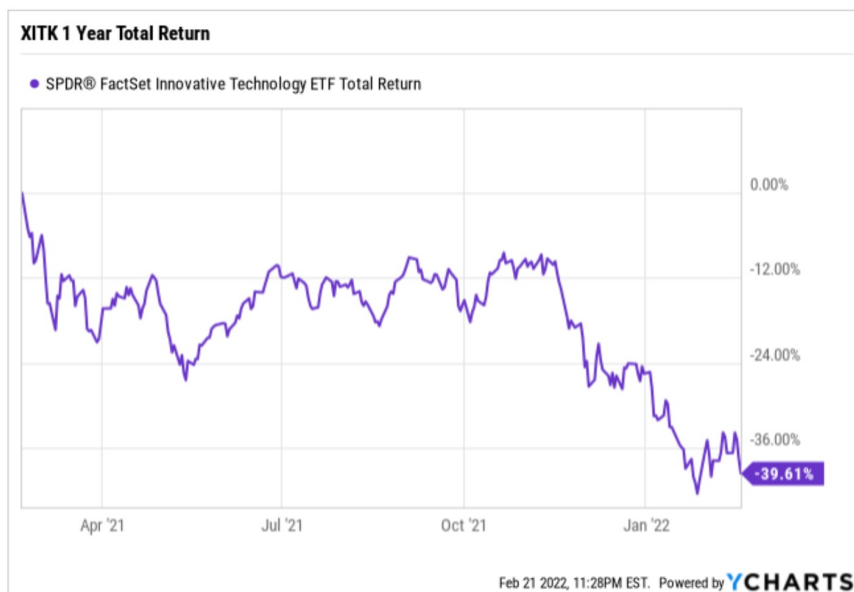

XITK is a near-perfect technology benchmark to monitor for sentiment towards high-growth stocks. If money starts rotating out of value sectors and back into momentum areas, you are going to see that price action materialize in a broad cross section of the

underlying holdings. Furthermore, it's not beholden to some of the legacy ultra-mega caps such as Apple, Microsoft, and Amazon that have graduated to a new level of cash cow business models.

I also realize that XITK may be too overtly "growthy" for some clients that want to participate in the tech sector recovery but want to stay with larger and more established companies in this space. An excellent alternative is via the **First Trust Dow Jones Internet Index Fund (FDN)**.

We have profiled this ETF several times in *Sevens Report Alpha*, and it continues to offer attractive characteristics that can't be ignored for this exact situation. To refresh your memory, FDN owns approximately 40 stocks that derive most of their revenue from internet related sales. This includes top holdings such as Amazon.com, Meta Platforms, Alphabet, Cisco Systems, and Salesforce.com. The fund currently

has more than \$7 billion in total assets and charges a net expense ratio of 0.51%.

The benefit to FDN is that its top weightings are skewed towards profitable mega-cap stocks. As such, it's likely to be less volatile than XITK on an apples-to-apples basis. This may allow for moderate growth risk tolerances to participate in this theme without over allocating to more speculative holdings.

This ETF has been swept up in the flush that many growth-oriented ETFs have experienced recently and is now sitting near its one-year lows. That recent underperformance shouldn't deter those that remember how FDN has blown past the competition in prior cycles. This fund has often excelled past the likes of XLK and QQQ when momentum

conditions favor its software and internet components.

FDN is well-rounded enough to supplant a traditional technology sector holding or be used as a tactical allocation to tilt the portfolio towards growth stocks. It's most appropriate for clients who are comfortable owning companies with a major online sales presence and that are investing in innovative technologies for the future.

SPDR FactSet Innovative Technology ETF (XITK)

Inception Date:	1/13/2016
Assets:	\$195M
Avg Daily Volume:	12.4K
Expense Ratio:	0.45%
# of Holdings:	101
YTD Return:	-18.91%
3-Yr Return:	53.40%
Mstar Rating:	3 Star

Investment Idea 2: Consumer Discretionary

The consumer discretionary sector has been one of the strongest areas of the market next to tech companies and any environment where economic activity continues to prosper is going to be net positive for these stocks. Recent wage data also is supportive of consumer activity, with the Federal Reserve Bank of Atlanta Wage Growth Tracker hitting levels not seen in nearly two decades. ([chart source](#))

If inflation peaks and wage growth continues to expand at a similar pace, it stands to reason that consumer discretionary spending will be the beneficiary of this ostensible gap. That bodes well for home improvement, restaurants, auto manufacturers, travel & leisure, specialty retail and other key sectors of the economy that have been on the rebound since the pandemic.

Our favorite exchange-traded fund for broad-based access to this sector is the **Vanguard Consumer Discretionary ETF (VCR)**. This ETF contains a broad basket of over 300 holdings spread over a wide axis of consumer stocks within the United States.

VCR's largest holdings include Amazon.com, Home Depot, Tesla, McDonald's, and Nike. It also contains meaningful exposure to Target, Starbucks, and Lowe's. The result is a well-balanced

portfolio of large- and mid-cap consumer spending stocks in a vehicle that has over \$6 billion in assets under management. And the fund charges a rock-bottom expense ratio of just 0.10%.

The recent price action of VCR suggests that its portfolio is getting swept up in the anxiety over rising interest rates and inflationary forces eating into corporate profits. There is no doubt that the companies in this fund are sensitive to both factors and would benefit if we started to see a leveling off of financing and raw

materials costs.

VCR is a continued bet on the economic recovery and expansion post-COVID. Nearly all its top holdings have a global footprint of sales, logistics, and long-term growth opportunities that make for compelling revenue upside both inside and outside the United States. This ETF is low cost, diversified, and liquid enough to be utilized as a core sector holding to capitalize on consumer-driven trends.

Investment Idea 3: High-Yield Bonds

There is little doubt at this point that the Fed is going to raise interest rates this year, and on balance, that policy change will be a net negative for high-quality fixed income. These sectors generally in-

Wage Growth Tracker

three-month moving average of median wage growth, hourly data

VCR 1 Year Total Return

clude government bonds, investment-grade corporates, and mortgage-backed securities, and they are some of the sectors likely to stall. This is particularly true for longer-dated paper that will experience the most price volatility in relation to rising Treasury yields.

Nevertheless, if the Fed rate hikes take on a slower pace, and other economic factors are supportive of continued stock market liquidity, there are areas of the bond market that will still thrive unimpeded. Foremost among these advantageous sectors are high-yield bonds.

Many of us grew up in this business referring to these assets as “junk bonds,” or companies with below investment-grade credit ratings. Their above-average yields originate due to the debt being issued with a premium coupon rate to offset the riskier credit worthiness of the sponsoring entity.

Most advisors will turn to the benchmark in the ETF world for high-yield bonds via the iShares iBoxx \$ High Yield Corporate Bond ETF (HYG). This \$16.5 billion behemoth is one of the most well-known vehicles to access high dividend yields and has been a mainstay in income portfolios due to its liquidity and diversified nature. If you are familiar with the qualities that make HYG attractive, then you are going to love this next-generation ETF from BlackRock that features several key upgrades.

The **iShares Broad USD High Yield Corporate Bond ETF (USHY)** debuted just over four years ago and has rapidly accumulated nearly \$7.6 billion in assets

during its short history. This fund takes a well-rounded approach to its portfolio construction methodology by widening the scope of its eligible security pool to include smaller issuers. It advertises itself as the broadest high-yield bond ETF with more than 2,100 underlying holdings derived from a wide gamut of U.S. companies.

The enhanced diversification qualities of USHY mean that its holdings are slightly tilted lower on the credit spectrum than the benchmark HYG.

This means that the fund is going to be more credit sensitive rather than interest rate sensitive on an apples-to-apples basis. That bodes well for the type of Goldilocks economic environment that would generate alpha in high-yield bonds.

Vanguard Consumer Discretionary ETF (VCR)

Inception Date:	1/26/2004
Assets:	\$6B
Avg Daily Volume:	178.K
Expense Ratio:	0.10%
# of Holdings:	307
YTD Return:	-11.97%
3-Yr Return:	86.31%
Mstar Rating:	4 Star

USHY 1 Year Total Return

As you can probably expect, this credit offset increases the income derived from the aggregate holdings as well. USHY sports a dividend yield of 5.30% with income paid monthly to shareholders. Roughly 20% higher yield than HYG at today's levels. Furthermore, both funds sport a modest effective duration of four

years and similar option-adjusted spreads of 330 basis points.

Another factor that will contribute to the long-term outperformance of USHY is its much lower cost. The fund carries a net expense ratio of 0.15%, which is nearly 70% lower than the 0.48% expense ratio of HYG. That makes it suitable for a true core allocation that even the most cost-sensitive client can be proud of.

It should come as no surprise that this high-yield ETF has experienced a similar selloff to start the year similar to the broader stock market. The combination of sharply rising Treasury yields and tightening risk appetites has spurred the junk bond market lower. Nevertheless, optimistic investors will be encouraged by the opportunity to purchase this holding at a meaningful discount to its prior highs.

USHY is suitable to be used as a meaningful allocation for growth-oriented clients that are seeking more capital appreciation potential in their portfolios. It can also be implemented sensibly for income clients that want to enhance the total yield of their accounts. Position size should be determined by the client's risk tolerance or income objectives when you are reviewing their allocations

Investment Idea 4: Senior Loans

The second must-own sector of the bond market in a scenario where interest rates are gradually rising, and stocks maintain their hot streak, are senior loans. Often referred to with terminology ranging from leveraged loans to floating rate notes and bank loans, these debt instruments are predominantly issued by companies with a below investment-grade rating and carry floating coupon rates. The coupon payment is typically indexed to a widely followed interest rate index such as 3-month LIBOR.

One of the advantages of these floating rate securities is that coupon floors exist, so as rates fall, investors still receive a respectable income stream.

However, as interest rates rise, the commensurate coupon rate also can rise, which can increase the mark-to-market value of the security. Lastly, the effective duration is typically tied to the security's reset rate, which is typically no longer than 60-90 days.

Our favorite vehicle to play this opportunity is one that continues to be a dominant player at the top of the rankings every year, and it is the **SPDR Blackstone Senior Loan ETF (SRLN)**. This actively managed fund has the

twin objectives of current income and capital preservation as its top priorities. It has managed to attract nearly \$10 billion in assets through a combination of security selection and risk management that has produced consistent market-beating results over the last half decade.

SRLN contains over 400 senior loan securities with floating rate components that achieve a dividend yield of 4.49%. Income from this ETF is paid monthly to shareholders, and it charges a net expense ratio of 0.70%.

What makes this fund more attractive than an index benchmark is the manager has the research capabilities and flexibility to take advantage of inefficiencies in the floating rate marketplace. They invest in a wide array of companies across market sectors such as business services, technology, healthcare, transportation, and finance.

SRLN has remained extremely steady through this latest round of volatility in the stock and bond markets. This demonstrates the value that investors place on floating rate securities as Treasury yields

iShares Broad USD High Yield Corporate Bond ETF (USHY)

Inception Date:	10/25/2017
Assets:	\$7.6B
Avg Daily Volume:	4.1M
Expense Ratio:	0.15%
# of Holdings:	2,111
YTD Return:	-0.52%
3-Yr Return:	15.15%
Mstar Rating:	4 Star

rise. It's going in the opposite direction of virtually every other bond fund over the last six months.

SRLN combines a similar credit quality mix as a fund such as USHY with the added benefit of that floating rate component to neutralize its interest rate sensitivity.

Investors who own SRLN should understand that its price action is going to be dictated by risk appetites for credit-sensitive sectors of the bond market. Furthermore, it's a great tactical diversification tool within the context of a growth or income portfolio to capture healthy dividends and capital appreciation along the way.

Conclusion

One of my favorite adages when it comes to investing is that the market isn't logical, it's psychological.

That means it doesn't always follow the preordained path of rational steps to deliver an outcome that everyone expects. This counterintuitive approach means that you must hedge your expectations when most investors are positioned for a certain result.

Those that are anticipating and/or those who want to be prepared for a potential best-case scenario would be wise to start looking towards the funds mentioned in this issue.

Doing so will have your playbook and buy list ready if and/or when we see an emergence of contrarian sentiment.

Best,

Tom

These three active bond ETFs—with better statistics and all-star portfolio management teams—stand a good chance at beating the Agg going forward.</p> <p>What to do now: Buy.</p>	<p>Issue 14: 2/20/18</p>	<p>BOND: 14.35% TOTL: 8.94% FTSL: 14.57%</p>	<p>AGG: 12.91%</p>

Sevens Report Alpha Fund & Stock Ideas

<u>Fund/Stock</u>	<u>Strategy</u>	<u>Date</u>	<u>Total Re-turn</u>	<u>Benchmark Performance Since Issue Date</u>
<u>Cash Alpha</u> FPNIX (FPA New Income)	<p>FPNIX has generated positive returns for 33 straight years. No other non-government bond fund can boast of an equivalent track record. We also featured "MaxMyInterest," which produces 140 to 150 basis points of alpha versus traditional cash vehicles (MMAs, MMFs, and CDs). Max also increases FDIC insurance and can give advisors visibility to held-away cash.</p> <p>What to do now: Buy (Max is also an excellent cash management solution).</p>	Issue 15: 3/6/18	FPNIX: 8.67%	BIL: 3.86%
<u>Index Rebal</u> KBA (KraneShares Bowers MSCI China A Share ETF)	<p>KBA is an index rebalance play based on the inclusion of Mainland Chinese equities (A-shares) into MSCI Global Standard Indexes. The first two steps will take place on June 1st and September 1st. KBA is our gateway to front-run massive index funds that will be forced to buy its underlying holdings.</p> <p>What to do now: Buy.</p>	Issue 16: 3/20/18	KBA: 28.70%	ACWX: 18.26%
<u>Anti-Trade War</u> QABA (First Trust Nasdaq ABA Community Bank Index Fund)	<p>QABA is a play to protect against trade war ramifications (97% of its sales are U.S.-sourced). Additionally, it should also be a beneficiary of U.S. tax reform, in that, smaller U.S. companies should capture most of the 35% to 21% corporate tax cut. We also featured three more ETFs (AMCA, AIRR, KRE) and two exclusive stock screens—run through Cap IQ—for advisors to share with clients who have trade war concerns.</p> <p>What to do now: Buy.</p>	Issue 18: 4/17/18	QABA: 22.68%	SPY: 68.72%
<u>Foreign Small Caps</u> VSS (Vanguard FTSE All-World ex-US Small-Cap ETF) DLS (WisdomTree International Small-Cap Dividend Fund)	<p>Most advisors don't allocate to international small caps. But, we think they should reconsider. This hidden asset class holds several advantages over its U.S. equivalents: cheaper valuations, less volatility, lower correlations, higher dividend yields, and past outperformance. We highlight multiple individual ETFs, ETF combinations, and actively-managed mutual funds that do the trick.</p> <p>What to do now: Buy.</p>	Issue 19: 5/1/18	VSS: 14.21% DLS: 4.32%	EFA: 18.74%
<u>Disruptive Innovation</u> ARKK (ARK Innovation ETF)	<p>Investing in the "cornerstone themes of disruptive innovation" has resulted in huge profits over time (think Amazon, Apple, and Netflix). ARK sees current investment opportunities in innovation platforms, such as automation, energy storage, DNA sequencing, next generation internet, blockchain technology, etc. ARK's top innovation-based themes are all represented in ARKK. In 2017, ARKK was the #1 performing ETF (excluding leveraged and inverse ETFs) with a return of 87%!</p> <p>What to do now: Buy.</p>	Issue 20: 5/15/18	ARKK: 59.70%	SPY: 68.18%
<u>Buybacks</u> PKW (Invesco Buy-Back Achievers ETF)	<p>Companies with meaningful share count reduction have outperformed over the long term with lower volatility. Currently, U.S. companies are flush with cash due to tax cuts and repatriation. In turn, share repurchases broke a new record in Q1 2018 and they're on pace to set a new record for 2018. PKW is the premier ETF to profit from buybacks (largest asset base and longest history). We also featured four alternative ETFs (SPYB, TTFS, DIVB, SYLD) and some individual stock lists.</p> <p>What to do now: Buy.</p>	Issue 21: 5/29/18	PKW: 65.96%	SPY: 69.43%
<u>"FANG and Friends" of Emerging Markets</u> EMQQ (Emerging Markets Internet & Ecommerce ETF)	<p>"By 2025, annual consumption in emerging markets will reach \$30 trillion—the biggest growth opportunity in the history of capitalism."—McKinsey & Company. The combination of four major forces in emerging markets make this a great investment setup: favorable demographics, increasing smartphone availability, surging wireless broadband and Wifi access, and the globalization of the capital formation process. EMQQ is the best ETF to invest in this great confluence. We also featured three alternative ETFs (ECON, KWEB, KEMQ).</p>	Issue 23: 6/26/18	EMQQ: 1.64%	EEM: 20.14%

<u>Capitalizing on mRNA and Other Medical Tech</u> ARK Genomic Revolution ETF (ARKG) Global X Telemedicine & Digital Health ETF (EDOC) ROBO Global Healthcare Technology & Innovation ETF (HTEC) Genomic Revolution Global X Genomics & Biotech ETF (GNOM)	Because of the success of mRNA in producing an effective COVID-19 vaccine at a record pace, along with the demonstrated effectiveness of anti-viral treatments like Remdesivir, we're likely to see a major acceleration in funding, research, and adoption of other cutting edge medical technologies and that means potentially substantial returns for companies with the right exposure.	7/13/2021	ARKG: -5.33% EDOC: -5.08% HTEC: -2.29% GNOM: -6.17%	SPY: 0.82%
<u>Five ETFs That Can Make Your Life As An Advisor Easier</u> Vanguard Total World Stock ETF (VT). iShares MSCI ACWI ETF (ACWI). iShares MSCI Global Min Vol Factor ETF (ACWV). iShares MSCI ACWI Low Carbon Target ETF (CRBN).	So how do you bridge the gap between an seven-figure trust and that clients nephew's tiny Roth IRA? Both are important to the overall relationship. You start by syncing up some of the foundational core holdings that make up the bulk of your asset allocation. Specifically, we identify foundational "own everything" ETFs you can use across account sizes to simplify smaller account administration and reduce variety among core ETF holdings, thereby making you more efficient:	7/27/2021	VT: 2.14% ACWI: 1.32% ACWV: 0.52% CRBN: 1.18%	SPY: 0.72%
<u>Stagflation Playbook</u> First Trust Dow Jones Internet Index Fund (FDN). Invesco S&P 500 Equal Weight Consumer Staples ETF (RHS). VanEck Vectors Investment Grade Floating Rate ETF (FLTR). Aberdeen Standard Bloomberg All Commodities Strategy K-1 Free ETF (BCI).	This Alpha issue is focused on something we sincerely hope never happens: Stagflation. That's because a stagflationary environment is a very difficult one to successfully invest in as, broadly speaking, it's negative for most stocks, most bonds, and idle cash (purchasing power is eroded through inflation). Positively, stagflation is not the most likely macro-economic scenario going forward (a stock positive reflation scenario is the most likely future macro set-up). But, stagflation risks are still at multi-decade highs, so the risks can't be totally ignored, either.	8/24/2021	FDN: -25.56% RHS: 6.66% FLTR: -0.17% BCI: 20.20%	SPY: -2.85%
<u>Learning to Live with COVID</u> Vaccine Markers (Multiple Stocks & ETFs) Global X Telemedicine & Digital Health ETF (EDOC). Amplify Online Retail ETF (IBUY). VanEck Vectors Morning Star Durable Dividend ETF (DURA).	In this Alpha issue, we examine the strategies and sectors that will benefit from society learning to "live" with COVID over the medium and longer-term, and the inspiration for this issue came from real life. We believe that reality will cause more permanent adoption of some "temporary" pandemic era behaviors, and we believe that should lead to some attractive investment opportunities.	9/8/2021	MRNA: -65.54% BBH: -28.99% EDOC: -25.88% IBUY: -39.44% DURA: 0.05%	SPY: -3.04%

<u>Best Performing COVID Strategies</u> Strategy One: Mega-Cap Tech. XLK/VGT/FDN. Strategy Two: Online Spending. SHOP/IBUY. Strategy Three: Blockchain. BLOK (Amplify Transformational Data Sharing ETF). Strategy Four: Smart-Beta Industrials. PAVE (Global X U.S. Infrastructure Development ETF).	Today's issue focuses on strategies that have outperformed since the pandemic started in March of 2020 and should continue to outperform as the market realizes it's got to "live" with COVID. More specifically, the Omicron variant has again reminded people and markets that COVID is not going away and that we will have flare-ups from variants for the foreseeable future.	12/14/2021	XLK: -9.98% VGT: -10.69% FDN: -18.13% SHOP: -52.37% IBUY: -22.92% BLOK: -22.01% PAVE: -6.02%	SPY: -6.33%
<u>Annual Contrarian Issue</u> Contrarian Investment Idea 1: The China Growth Story Re-Emerges. KraneShares CSI China Internet ETF (KWEB) and WisdomTree China ex-State-Owned Enterprises Fund (CXSE). Contrarian Investment Idea 2: Gold & Silver Miners Dig Up Profits. VanEck Vectors Gold Miners ETF (GDX) and Global X Silver Miners ETF (SIL). Contrarian Investment Idea 3: Investors Flock To Low Volatility Sectors. Utilities Select Sector SPDR (XLU) and PowerShares S&P 500 Low Volatility ETF (SPLV).	Today's Alpha is our annual Contrarian Issue, where we identified some of the worst-performing sectors and factors for 2021 and analyzed them to identify three sectors that we think could be poised for a big turnaround in 2022. We have produced this annual Contrarian Issue for the last several years to serve two primary functions. First, I'm a contrarian investor at heart, and I always enjoy scouring what "didn't" work during an investment year to determine whether these relatively cheap sectors or factors present an attractive opportunity, as contrarian investing can lead to outperformance. Second, we like to provide these contrarian ideas so that if a client asks you "What's cheap right now?" or "Are there any opportunities from last year?" you have interesting, well-founded ideas that can impress clients and prospects.	12/28/2021	KWEB: -10.39% CXSE: -7.17% GDX: 9.20% SIL: -4.13% XLU: -6.54% SPLV: -7.82%	SPY: -10.46%
<u>Practical Crypto Strategies for Clients</u> Greyscale Bitcoin Trust (GBTC) Amplify Transformational Data Sharing ETF (BLOK) ProShares Bitcoin Strategy ETF (BITO)	The push of cryptos into the cultural mainstream in 2022, along with substantial investment gains over the past several years, has resulted in a surge in interest in crypto exposure from investors. And, while there remains a lot of risks associated with crypto trading, the bottom line is that an advisor can only dissuade a client from cryptos for so long before it hurts the relationship. Given that, our goal in today's Alpha issue is to highlight some of the best and most responsible strategies to provide clients with crypto exposure without taking an overabundance of risk.	1/11/2022	GBTC: -16.87% BLOK: -15.70% BITO: -13.07%	SPY: -6.37%

<u>Weathering Market Volatility with "Quality" ETFs.</u> Quality Idea 1: Financials. First Trust Financials AlphaDex Fund (FXO). Quality Idea 2: Qualitative Value. ValueShares U.S. Quantitative Value ETF (QVAL). Quality Idea 3: Shareholder Yield. Cambria Shareholder Yield ETF (SYLD). Quality Idea 4: Core Value. Invesco S&P 500 Pure Value ETF (RPV).	This Alpha issue is an important complement to what we've been discussing in the regular Sevens Report, namely that we believe the best way to weather this increased volatility in markets is by allocating to "Quality" stocks, sectors, and ETFs. For us, "quality" means those stocks and ETFs with lower relative price-to-earnings (P/E) and price-to-book (P/B) ratios, strong free cash flow, and solid shareholder yield. We believe these stocks and sectors will be the most insulated from the effects of interest rate hikes, possibly slowing growth and other headwinds, and find themselves as high-quality landing spots for investment capital.	1/25/2022	FXO: 4.28% QVAL: 0.66% SYLD: 1.25% RPV: 3.52%	SPY: 2.73%
<u>Finding Value and Opportunity in International ETFs</u> Schwab Fundamental International Large Company Index ETF (FNDF). iShares Edge MSCI Intl Quality Factor ETF (IQLT). Vanguard International High Dividend Yield ETF (VYMI).	We've been talking a lot in the Sevens Report about wanting to allocate towards lower P/E sectors, and the fact is that quality international stocks in developed markets are currently trading at heavy discounts to the S&P 500. We think the combination of low valuations and less-aggressive central banks makes international exposure an important part of a diversified investment strategy going forward.	2/8/2022	FNDF: -2.29% IQLT: -3.06% VYMI: -1.92%	SPY: -4.74%
