

SEVENS REPORT *alpha*

April 5, 2022

In Today's Issue

- **Finding Opportunities in the New Energy Reality.** The Russia/Ukraine war has fundamentally altered the flow of energy around the world, as European countries wean themselves off Russian energy imports. This transition will take time and create opportunities across the energy sector, and we want to identify the sectors and ETFs that stand to benefit from this seminal shift.
- **Idea 1: Natural Gas. First Trust Natural Gas ETF (FCG).** Europe has converted much of its power infrastructure to natural gas in an effort to reduce emissions, so demand for natural gas from stable countries (the U.S.) will rise. FCG has gained more than 90% over the past year and trades at 12.5X earnings, outperforming the more widely held XOP (up 65% over the past year).
- **Idea 2: Uranium. Global X Uranium ETF (URA).** 25% of EU power production comes from nuclear and it's likely to be a larger part of the new energy mix going forward. URA is the best comprehensive nuclear ETF in the market and 15% of the ETF has direct exposure to uranium. URA has returned more than 35% YTD.
- **Idea 3: Global LNG Shipping. SonicShares Global Shipping ETF (BOAT), Cheniere Energy Inc. (LNG), Flex LNG Ltd (FLNG).** Natural gas imports to Europe from the U.S. and the Middle East will increase demand for oil and gas tankers and export infrastructure. LNG is one of the biggest LNG exporters in the U.S., while FLNG operates a fleet of LNG tankers. BOAT is a comprehensive shipping ETF, although it does have a low AUM.

Finding Opportunities in the New Energy Reality

One of the major second-order effects from the Russia/Ukraine conflict is that energy importing nations are immediately facing a new reality. Much of the oil and natural gas that was exported from Russia is being universally banned by the Western world. The goal being to direct financial sanctions and initiate isolation measures on the Russian economy.

That penalty, while much deserved by the Russian aggressors, is going to create new challenges in operations for large-scale energy consumers throughout Europe. Think utilities, government entities, industrial manufacturers, and materials companies.

Just how big of a deal is the Russian energy sector and what will the impact be globally?

- Russia is the third-largest producer of oil in the world, behind the U.S. and Saudi Arabia.
- Of the approximately 5 million barrels of crude oil it exports each day, more than half of that goes to Europe.
- In 2021, the European Union imported 155 billion cubic meters of natural gas from Russia, accounting for around 45% of EU gas imports and close to 40% of its total gas consumption ([source](#)).

This means key energy supplies will have to be diverted from other regions to meet demand in Europe and North America.

Right on cue, President Biden and European leaders announced a major initiative to direct shipments of liquefied natural gas to Europe during his visit to Brussels, part of a broader effort to help reduce Europe's dependence on Russian energy.

That means turning to new sources of production from exporters such as the United States, Saudi Arabia, and South America. Energy transportation routes are also likely to be re-evaluated with ship-

ping tankers being utilized to move liquid natural gas and crude oil supplies around the globe. Additionally, there will likely be a pivot to legacy energy production methods such as nuclear fuel as a temporary stop gap.

The goal for most developed nations is to bring on more clean energy-producing methods to mitigate climate change. However, the reality is that the technology and resources just aren't at the level needed to provide large-scale, continuous supply in such a short time.

It's also probable that this new energy reality has some staying power. Even if Russia bows out of its aggressive stance in the near term, they have ruined their political reputation among European trading partners. It won't be back to business as usual any time soon.

Therein lies the opportunity for investors seeking out fresh trends to capitalize on as these shifting economic forces develop. Our research has uncovered some of the best-of-breed solutions to take advantage of these energy dislocations and generate alpha-focused ideas for your client portfolios.

Investment Idea 1: Natural Gas

Europe's goal of reducing its fossil fuel emissions has been primarily led by shuttering legacy coal production in favor of cleaner burning natural gas. This hybrid solution gained significant traction as a method of upgrading aging utility infrastructure over the last several decades and has turned the continent into a major importer of this energy resource.

The main sticking point is that the natural gas manufacturing process is far more complex and costly. It's hard to find, difficult to transport, and largely a more complicated supply chain situation.

That structural paradigm should be viewed as an enticing investment proposition because Europe is "all in" on this course and must continue to source reliable natural gas supplies. Furthermore, natural gas prices are experiencing inflationary trends that make for a very healthy profit environment for the companies engaged in exploration and production.

One way to access this space is through a pure play ETF designed to select a broad basket of stocks engaged in the natural gas ecosystem. For that purpose, we turn to

the **First Trust Natural Gas ETF (FCG)**. This fund is based on the ISE-Revere Natural Gas Index, which selects exchange-listed companies that derive a substantial portion of their revenue from the exploration and production of this vital resource.

First Trust is known for their inimitable smart-beta index funds and FCG is no exception. The index screening criteria starts with known companies in the natural gas world and filters out those that don't meet certain requirements for proven gas reserves. The remaining stocks must also meet minimum market capitalization, liquidity, and fundamental filters to be eligible for inclusion in the basket.

The result is a group of 44 high-quality U.S. stocks and master limited partnerships that are laser focused on this industry. Top holdings currently include ConocoPhillips, EOG Resources, Occidental Petroleum, Devon Energy, and DCP Midstream LP. The ETF uses a capped-weighting methodology

within the basket to ensure no single holding accounts for more than 5% of the total portfolio. This eliminates the issues of a conventional market-cap allocation structure that creates imbalances in capital distribution.

FCG has ridden the tailwind of energy price appreciation over the last year and has risen nearly 90% on a total return basis. The chart demonstrates a high degree of momentum relative to other market sectors as it hit new 52-week highs to close out the first quarter of 2022.

That's an impressive move, but one that still has far more room to the upside when you look back at the correlation between past periods of commodity price inflation. The fundamentals still indicate reasonable valuations as well with a stingy price-to-earnings ratio of just 12.5 at current levels.

This ETF has been in existence since 2007 and as amassed more than \$678 million in assets under management. The fund also trades more than 2.2 million shares daily on average and has proven to be liquid enough for larger trading strategies. Its expense ratio sits at 0.61%, which is in line with expectations for a smart-beta index fund in a niche market segment.

FCG can be best utilized to tilt a portion of your client portfolios towards the secular profit opportunities in the natural gas arena. The niche basket of stocks means that it is best suited as a tactical position that complements more diversified core holdings. This segment of the energy industry is apt to experience long-term benefits from the global demand for natural gas and continued transition to cleaner fuel sources.

Another energy opportunity to consider for heavy natural gas exposure is the **SPDR S&P Oil & Gas Exploration & Production ETF (XOP)**. As a reminder, this fund is the fourth largest domestic energy ETF by asset size with over \$5.7 billion under management. The underlying index tracks a range of 60 multi-cap stocks that are engaged in the exploration, production, and refinement of oil and gas. It uses a modified equal-weighting index methodology to evenly spread assets over the entire basket and charges a modest 0.35% expense ratio.

This current environment shows just how beneficial

that well-balanced mix of assets is when viewing the returns on both a relative and absolute basis. Over the last year, XOP has gained 64.6% and continues to hit new 52-week highs throughout the first quarter of 2022.

What's even more impressive is that even with the rapid

price ascent, the fund's aggregate price-to-earnings ratio is still listed at an attractive 15.5. These stocks are clearly benefitting from the excess commodity appreciation on their financial statements, which is likely to propel these stocks even further over the near term. The combination of these factors gives us confidence that XOP is appropriate for diversified ETF growth portfolios that are looking to cultivate sustainable inflation-linked opportunities.

Investment Idea 2: Nuclear Energy

Nuclear energy production fell out of favor as a cleaner alternative to coal or petroleum burning facilities in 2011 when the Fukushima nuclear disaster hit Japan. However, when faced with the hard realities of energy security, there is going to be a renewed interest in keeping existing nuclear facilities active and possibly even expanding production

to accommodate the necessary demand. In 2019, one quarter of Europe's energy production came from nuclear power, and it is considered a "low carbon" solution like natural gas.

The interesting dynamic in play with nuclear energy is that the 27 EU member nations have split opinions about its efficacy. Countries such as France, Czech Republic, Netherlands, and Poland are actively engaging in new investment in this sector, while Austria, Denmark, Germany, Luxembourg, and Portugal oppose nuclear power solutions ([source](#)). Of course, that may change when faced with the "lesser of two evils" decision that nations will have to make when considering the tradeoff between energy supply and demand.

Research conducted by Mark Hibbs of the Carnegie Endowment for International Peace concluded the following:

Without new investment to replace and extend the lifetime of Europe's existing power reactors, the EU will gradually lose a large share, perhaps half, of its nuclear power generation capacity by 2050. EU

states may focus more near-term attention on maintaining and building large power stations than on new mini reactors. Large-scale projects for new nuclear power plants incur high capital costs, long construction periods, and risks of potential delays.

At the minimum, the Russian conflict is going to bolster the case for continuing nuclear energy output at current levels with existing facilities. There is also a better-than-even chance that several nations take additional steps to enhance their energy security using this established method. Those factors en-

hance the appeal of global stocks engaged in the discovery and production of nuclear components.

Our preferred vehicle to participate in this sector is via the **Global X Uranium ETF (URA)**. The goal of this diversified vehicle is to provide investors access to a broad range of companies involved in uranium mining and the production of nuclear components, including those in extraction, refining, exploration, or manufacturing of equipment for the uranium and nuclear industries.

That translates to a basket of 57 global companies engaged in this industry with the largest being the well-known Cameco Corp. This multi-national nuclear conglomerate accounts for nearly one-quarter of the ETF's assets and as such will have an outsized influence on total performance. Furthermore, URA is truly a globally diversified ETF with most of its components traded on foreign exchanges. Canada makes up almost half of the country allocation, followed by Australia, South Korea, and Japan.

What also makes this ETF unique among its peers is that it holds a 15% allocation (second largest posi-

tion) in a Canadian-based fund that owns physical Uranium. Think of it like the Uranium version of GLD. In this manner, investors can conveniently participate in the performance of the commodity itself as it relates to the nuclear energy industry.

That unique mix of assets and the rap-

idly changing landscape of energy requirements has made a clear impact on the performance of URA since the Russia/Ukraine conflict broke out. The fund has risen more than 35% since the January lows and continues to demonstrate strong technical price patterns. Over the last 52 weeks, the fund has

gained 40.9% as compared to relatively flat returns in conventional international benchmarks.

The dislocation to the broader market is what makes this ETF so attractive as a true alpha-generator. URA is a niche energy industry investment vehicle with the potential for explosive growth as we see a resurgence in nuclear demand globally. It's best-use case is for growth portfolios that are looking for tactical allocations in industrial stocks outside the United States.

Another feather in the cap of URA is the fund has nearly \$2 billion in total assets and trades 3.6 million shares per day on average. That provides a deep well of liquidity that advisors can count on when trading in size. Furthermore, it sports a reasonable 0.69% expense ratio, which is in line with comparable ETFs of its kind.

Investment Idea 3: Global Shipping & Logistics

One important facet of the energy import trade in Europe that must be accounted for is the shift from land to sea-based transportation platforms. Russian oil and gas are typically imported via land routes that now have been reduced or cut off entirely. Pivoting to secure supplies from the United States, the Middle East, or South America will require a heavy emphasis on shipping commodities over the ocean.

This strengthens the case for the global shipping industry and the companies that support maritime logistics.

A new ETF makes it easy to own most of the shipping industry in one vehicle to capitalize on a surge in demand. The **SonicShares Global Shipping ETF**

(BOAT) debuted in August 2021 and has already made a big splash in just a few short months.

BOAT is based on the Solactive Global Shipping Index, which consists of global shipping companies engaged in the maritime transportation of goods and raw materials, including consumer and industrial products, vehicles, dry bulk, crude oil and liquefied natural gas. Maritime shipping is considered the backbone of international trade and the global economy as around 90% of the world's trade is carried by sea.

The index consists of approximately 50 holdings with no single company making up more than 5% of the total basket. Top stocks include HAPAG-LLOYD AG, Orient Overseas Intl, Mitsui OSK Lines, and ZIM Integrated Shipping. The industry dispersion is tilted towards Container Deep Sea Shipping with 60% of the portfolio weight, followed by Dry Bulk Shipping (20%), Crude Transportation (10%), Multi-Type Deep Sea (5.2%), and LNG Transportation (2%).

As you can see in the chart, BOAT has rapidly climbed since the escalation of the Russia/Ukraine

conflict. This ETF has gained 42.6% since its debut in the middle of last year and continues to demonstrate an attractive, uncorrelated price pattern versus the broader market.

Investors in these global shipping stocks are clearly focused on the robust demand for deep sea transpor-

tation through all facets of the global economy. This is particularly true when it comes to supporting the new reality for energy importers.

Another attractive feature of shipping stocks is their robust dividend payout ratios. BOAT is currently sporting a 30-day SEC yield of 4.13% with income paid quarterly to shareholders. Like many international indexes, the dividends from this fund will be lumpy over the course of a year but have historically been above average when compared to other market sectors.

One note of caution in this ETF is that the total asset size of the fund is just \$29.65 million. That means daily trading liquidity might be more difficult to procure and limited orders are heavily encouraged on both sides of the trade. By its economically sensitive nature, BOAT will be more volatile than other comparable transportation stocks

as well. Those factors should be considered when sizing portfolio allocations to mitigate undue risks.

Nevertheless, this sector has already demonstrated alpha-generating qualities through the teeth of the overseas conflict and should be on your radar as a barometer of global trade. It's likely that this fund will show instinctive characteristics of economic expansion and will thrive as additional shipping demand is required.

We also realize that there may be too many limiting factors to cohesively implement BOAT in client portfolios as well as recognize those investors that prefer holding individual stocks. We have that angle covered with two recommendations that fit into this theme and offer a fresh transportation dynamic to explore.

The first being **Cheniere Energy Inc. (LNG)**, which produces and exports liquid natural gas. The company has rapidly grown to be the largest LNG com-

pany in the United States and the second largest in the world. It operates liquification facilities in Texas and Louisiana as well as terminals to export the product globally.

Sales nearly doubled in 2021 to more than \$17.6 billion and it's likely that further U.S. commitments to Europe for this resource will be directed through Cheniere. In fact, during their last earnings an-

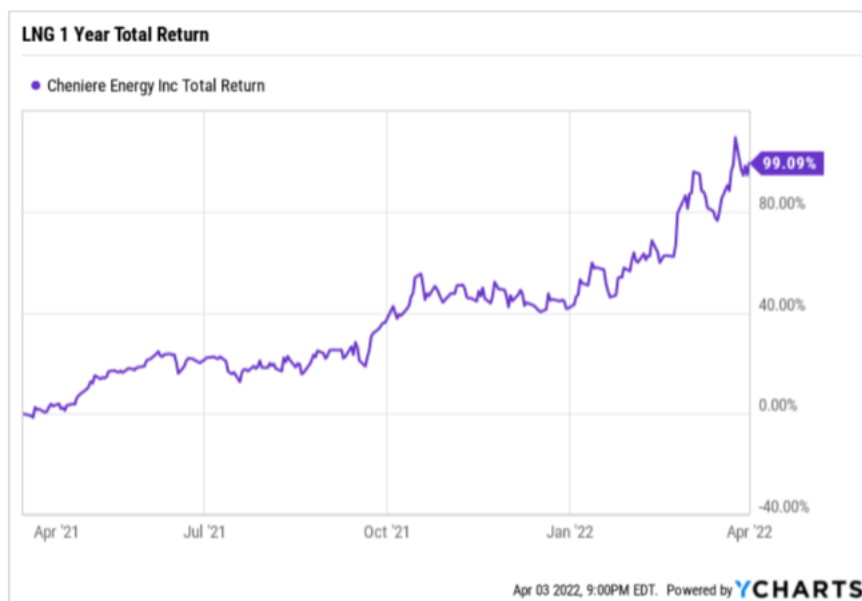

nouncement in February, Cheniere bolstered its full-year financial guidance in adjusted EBITDA and distributable cash flow. A sign of healthy profits on the horizon.

The company's share price also has doubled over the last year and currently sports a market cap of \$35 bil-

lion. The chart here shows a strong trend of technical support that has shown a consistent pattern trending above its short- and long-term moving averages.

This unique LNG logistics stock has a proven track record of growth and is one of the most established stocks in its segment. Two factors that make it hard to ignore for those that are bullish on the long-term supply dynamics shifting from Russia to the United States.

If you love the global energy shipping theme and want to participate in a pure-play stock, there is an excellent option to consider in **Flex LNG Ltd (FLNG)**. The company operates a fleet of 13 fuel-efficient, fifth-generation LNG carriers that transport liquid natural gas around the world. Originally domiciled in Bermuda, the company offered shares via the Oslo stock exchange in 2017 and was listed via the NYSE in June 2019 under the ticker FLNG.

In 2021, FLNG grew revenues to nearly \$3 billion with a prodigious net income of \$1.4 billion on the bottom line. That represented one of its strongest financial performance years and management reiterated expectations for robust distributable cash flow in 2022 according to its most-recent earnings release.

In fact, one of the reasons to love this stock is its outsized quarterly dividend, which was just raised in December 2021 to \$0.75 per share. That equates to a current yield of 7.85% at today's share prices.

The share price of FLNG has risen nearly 265% over the last 52-weeks on a total return basis, as strength throughout the energy transportation sector and successful business execution has acted as a strong tailwind. Even with that growth, the stock still trades at a wholesome P/E of 9.6 and a friendly market cap of \$1.56 billion.

ize on this opportunity and who believe that inflation will run hot for the next several years would be wise to consider these investment choices. They coincide well with the current economic environment, are showing a high degree of positive price divergence, and can provide tremendous upside if these commodity trends remain in place.

Best,

Tom

This stock is represented in the BOAT ETF, but due to its smaller size, it won't have much impact on the overall performance of the fund. Investors that want to own more exposure to the natural gas segment of the maritime transportation sector may opt to utilize this company as a supplemental holding. Its strong financial performance, technical price appreciation, high yield, and unique positioning within the shipping industry make for a compelling investment proposition.

Conclusion

The speed with which the Russia/Ukraine conflict has escalated is shocking, but the ripple effects from the global trade fallout have the capability to spread far and wide. Investors who want to capital-

<u>Special Dividends</u> List of 24 stocks	Screened 17,070 stocks to arrive at 24 stocks that have consistently paid large special dividends. Investors can't see the true yields on these stocks because they're missing from financial websites. Our elite list has yields ranging from 50% to 600% higher than the S&P 500's yield. What to do now: Buy (multiple ways to implement in issue).	Issue 6: 10/31/17	Basket of stocks (avg.): 7.37%	50% SPY/50% AGG: 3.77%
<u>Global Value</u> GVAL (Cambria Global Value ETF)	A fundamentally-focused deep value strategy that uses a cyclically-adjusted valuation composite to evaluate 45 global countries for investment. GVAL captures the cheapest countries and the cheapest stocks in those specific countries, too. What to do now: Buy.	Issue 9: 12/12/17	GVAL: -0.97%	ACWX: 20.58%
<u>"Backdoor" Hedge Fund Investing</u> List of 10 stocks	It's almost impossible for investors to access the world's best hedge fund managers. Either their funds are closed, the minimums are too steep (in the millions), or the fees are outrageously high ('2 & 20'). We found 10 little-known ways to access ace managers who have produced Buffett-like returns. What to do now: Buy (multiple ways to implement in issue).	Issue 10: 12/27/17	Basket of stocks (avg.): -5.09%	50% SPY/50% AGG: 1.30%
<u>EM & FM Bonds</u> EMB (iShares JPM USD Emerging Markets Bond ETF) EMLC (VanEck JPM EM Local Currency Bond ETF) EBND (SPDR Bloomberg Barclays Emerging Markets Local Bond ETF) AGEYX (American Beacon Global Evolution Frontier Markets Income Fund)	Most investors have no allocation to fixed income outside the U.S., but we think it's worth serious consideration. Emerging and frontier debt funds have yields 2X, 3X, and 4X the yields of traditional fixed income investments... low correlations to major asset classes... and healthier fundamentals (lower debt-to-GDP ratios, faster-growing economies, and better demographics) from a country perspective. EMB (emerging market debt hard currency), EMLC/EBND (emerging market debt local currency), and AGEYX (actively-managed frontier market debt) are all attractive options. What to do now: Buy.	Issue 11: 1/9/18	EMB: 2.28% EMLC: -10.47% EBND: -9.40% AGEYX: 11.02%	AGG: 8.38%
<u>"Blockchain" Investing</u> BLOK (Amplify Transformational Data Sharing ETF) BLCN (Reality Shares Nasdaq NexGen Economy ETF)	Blockchain, the technology behind cryptos, has the potential to change many industries. Having the right exposure to companies using or pioneering the use of blockchain, offers substantial long-term growth opportunities. Not only did we break the story on the first two blockchain ETFs (BLOK and BLCN) ahead of every financial media outlet, we also provided a sneak peek at their top holdings and a blockchain primer. What to do now: Buy (multiple ways to implement in issue).	Issue 12: 1/16/18	BLOK: 104.70% BLCN: 61.48%	SPY: 76.53%
<u>"Active" Bond ETFs</u> BOND (PIMCO Active Bond ETF) TOTL (SPDR DoubleLine Total Return Tactical ETF) FTSL (First Trust Senior Loan Fund)	Studies show actively-managed fixed income funds have been much more successful at beating benchmarks than actively-managed equity funds. In addition, the "Agg" has changed for the worse over time: higher duration, lower yield, and less diversification. These three active bond ETFs—with better statistics and all-star portfolio management teams—stand a good chance at beating the Agg going forward. What to do now: Buy.	Issue 14: 2/20/18	BOND: 10.68% TOTL: 6.51% FTSL: 14.88%	AGG: 10.12%

Sevens Report Alpha Fund & Stock Ideas

<u>Fund/Stock</u>	<u>Strategy</u>	<u>Date</u>	<u>Total Re-turn</u>	<u>Benchmark Performance Since Issue Date</u>
<u>Cash Alpha</u> FPNIX (FPA New Income)	<p>FPNIX has generated positive returns for 33 straight years. No other non-government bond fund can boast of an equivalent track record. We also featured "MaxMyInterest," which produces 140 to 150 basis points of alpha versus traditional cash vehicles (MMAs, MMFs, and CDs). Max also increases FDIC insurance and can give advisors visibility to held-away cash.</p> <p>What to do now: Buy (Max is also an excellent cash management solution).</p>	<p>Issue 15: 3/6/18</p>	<p>FPNIX: 7.42%</p>	<p>BIL: 3.89%</p>
<u>Index Rebal</u> KBA (KraneShares Bosera MSCI China A Share ETF)	<p>KBA is an index rebalance play based on the inclusion of Mainland Chinese equities (A-shares) into MSCI Global Standard Indexes. The first two steps will take place on June 1st and September 1st. KBA is our gateway to front-run massive index funds that will be forced to buy its underlying holdings.</p> <p>What to do now: Buy.</p>	<p>Issue 16: 3/20/18</p>	<p>KBA: 21.45%</p>	<p>ACWX: 17.70%</p>
<u>Anti-Trade War</u> QABA (First Trust Nasdaq ABA Community Bank Index Fund)	<p>QABA is a play to protect against trade war ramifications (97% of its sales are U.S.-sourced). Additionally, it should also be a beneficiary of U.S. tax reform, in that, smaller U.S. companies should capture most of the 35% to 21% corporate tax cut. We also featured three more ETFs (AMCA, AIRR, KRE) and two exclusive stock screens—run through Cap IQ—for advisors to share with clients who have trade war concerns.</p> <p>What to do now: Buy.</p>	<p>Issue 18: 4/17/18</p>	<p>QABA: 13.91%</p>	<p>SPY: 80.33%</p>
<u>Foreign Small Caps</u> VSS (Vanguard FTSE All-World ex-US Small-Cap ETF) DLS (WisdomTree International Small-Cap Dividend Fund)	<p>Most advisors don't allocate to international small caps. But, we think they should reconsider. This hidden asset class holds several advantages over its U.S. equivalents: cheaper valuations, less volatility, lower correlations, higher dividend yields, and past outperformance. We highlight multiple individual ETFs, ETF combinations, and actively-managed mutual funds that do the trick.</p> <p>What to do now: Buy.</p>	<p>Issue 19: 5/1/18</p>	<p>VSS: 17.46%</p> <p>DLS: 4.02%</p>	<p>EFA: 19.00%</p>
<u>Disruptive Innovation</u> ARKK (ARK Innovation ETF)	<p>Investing in the "cornerstone themes of disruptive innovation" has resulted in huge profits over time (think Amazon, Apple, and Netflix). ARK sees current investment opportunities in innovation platforms, such as automation, energy storage, DNA sequencing, next generation internet, blockchain technology, etc. ARK's top innovation-based themes are all represented in ARKK. In 2017, ARKK was the #1 performing ETF (excluding leveraged and inverse ETFs) with a return of 87%!</p> <p>What to do now: Buy.</p>	<p>Issue 20: 5/15/18</p>	<p>ARKK: 78.42%</p>	<p>SPY: 79.69%</p>
<u>Buybacks</u> PKW (Invesco Buy-Back Achievers ETF)	<p>Companies with meaningful share count reduction have outperformed over the long term with lower volatility. Currently, U.S. companies are flush with cash due to tax cuts and repatriation. In turn, share repurchases broke a new record in Q1 2018 and they're on pace to set a new record for 2018. PKW is the premier ETF to profit from buybacks (largest asset base and longest history). We also featured four alternative ETFs (SPYB, TTFS, DIVB, SYLD) and some individual stock lists.</p> <p>What to do now: Buy.</p>	<p>Issue 21: 5/29/18</p>	<p>PKW: 69.53%</p>	<p>SPY: 81.02%</p>
<u>"FANG and Friends" of Emerging Markets</u> EMQQ (Emerging Markets Internet & Ecommerce ETF)	<p>"By 2025, annual consumption in emerging markets will reach \$30 trillion—the biggest growth opportunity in the history of capitalism."—McKinsey & Company. The combination of four major forces in emerging markets make this a great investment setup: favorable demographics, increasing smartphone availability, surging wireless broadband and Wifi access, and the globalization of the capital formation process. EMQQ is the best ETF to invest in this great confluence. We also featured three alternative ETFs (ECON, KWEB, KEMQ).</p> <p>What to do now: Buy.</p>	<p>Issue 23: 6/26/18</p>	<p>EMQQ: -1.21%</p>	<p>EEM: 16.80%</p>

<u>Capitalizing on mRNA and Other Medical Tech</u> ARK Genomic Revolution ETF (ARKG) Global X Telemedicine & Digital Health ETF (EDOC) ROBO Global Healthcare Technology & Innovation ETF (HTEC) Genomic Revolution Global X Genomics & Biotech ETF (GNOM)	Because of the success of mRNA in producing an effective COVID-19 vaccine at a record pace, along with the demonstrated effectiveness of anti-viral treatments like Remdesivir, we're likely to see a major acceleration in funding, research, and adoption of other cutting edge medical technologies and that means potentially substantial returns for companies with the right exposure.	7/13/2021	ARKG: -5.33% EDOC: -5.08% HTEC: -2.29% GNOM: -6.17%	SPY: 0.82%
<u>Five ETFs That Can Make Your Life As An Advisor Easier</u> Vanguard Total World Stock ETF (VT). iShares MSCI ACWI ETF (ACWI). iShares MSCI Global Min Vol Factor ETF (ACWV). iShares MSCI ACWI Low Carbon Target ETF (CRBN).	So how do you bridge the gap between an seven-figure trust and that clients nephew's tiny Roth IRA? Both are important to the overall relationship. You start by syncing up some of the foundational core holdings that make up the bulk of your asset allocation. Specifically, we identify foundational "own everything" ETFs you can use across account sizes to simplify smaller account administration and reduce variety among core ETF holdings, thereby making you more efficient:	7/27/2021	VT: 2.14% ACWI: 1.32% ACWV: 0.52% CRBN: 1.18%	SPY: 0.72%
<u>Stagflation Playbook</u> First Trust Dow Jones Internet Index Fund (FDN). Invesco S&P 500 Equal Weight Consumer Staples ETF (RHS). VanEck Vectors Investment Grade Floating Rate ETF (FLTR). Aberdeen Standard Bloomberg All Commodities Strategy K-1 Free ETF (BCI).	This Alpha issue is focused on something we sincerely hope never happens: Stagflation. That's because a stagflationary environment is a very difficult one to successfully invest in as, broadly speaking, it's negative for most stocks, most bonds, and idle cash (purchasing power is eroded through inflation). Positively, stagflation is not the most likely macro-economic scenario going forward (a stock positive reflation scenario is the most likely future macro set-up). But, stagflation risks are still at multi-decade highs, so the risks can't be totally ignored, either.	8/24/2021	FDN: -19.96% RHS: 8.42% FLTR: -0.60% BCI: 32.47%	SPY: 2.61%
<u>Learning to Live with COVID</u> Vaccine Markers (Multiple Stocks & ETFs) Global X Telemedicine & Digital Health ETF (EDOC). Amplify Online Retail ETF (IBUY). VanEck Vectors Morning Star Durable Dividend ETF (DURA).	In this Alpha issue, we examine the strategies and sectors that will benefit from society learning to "live" with COVID over the medium and longer-term, and the inspiration for this issue came from real life. We believe that reality will cause more permanent adoption of some "temporary" pandemic era behaviors, and we believe that should lead to some attractive investment opportunities.	9/8/2021	MRNA: -58.24% BBH: -23.44% EDOC: -21.20% IBUY: -41.95% DURA: 4.16%	SPY: 1.44%

<u>Best Performing COVID Strategies</u> Strategy One: Mega-Cap Tech. XLK/VGT/FDN. Strategy Two: Online Spending. SHOP/IBUY. Strategy Three: Blockchain. BLOK (Amplify Transformational Data Sharing ETF). Strategy Four: Smart-Beta Industrials. PAVE (Global X U.S. Infrastructure Development ETF).	Today's issue focuses on strategies that have outperformed since the pandemic started in March of 2020 and should continue to outperform as the market realizes it's got to "live" with COVID. More specifically, the Omicron variant has again reminded people and markets that COVID is not going away and that we will have flare-ups from variants for the foreseeable future.	12/14/2021	XLK: -4.83% VGT: -5.14% FDN: -11.98% SHOP: -46.28% IBUY: -20.07% BLOK: -14.94% PAVE: 0.52%	SPY: -1.09%
<u>Annual Contrarian Issue</u> Contrarian Investment Idea 1: The China Growth Story Re-Emerges. KraneShares CSI China Internet ETF (KWEB) and WisdomTree China ex-State-Owned Enterprises Fund (CXSE). Contrarian Investment Idea 2: Gold & Silver Miners Dig Up Profits. VanEck Vectors Gold Miners ETF (GDX) and Global X Silver Miners ETF (SIL). Contrarian Investment Idea 3: Investors Flock To Low Volatility Sectors. Utilities Select Sector SPDR (XLU) and PowerShares S&P 500 Low Volatility ETF (SPLV).	Today's Alpha is our annual Contrarian Issue, where we identified some of the worst-performing sectors and factors for 2021 and analyzed them to identify three sectors that we think could be poised for a big turnaround in 2022. We have produced this annual Contrarian Issue for the last several years to serve two primary functions. First, I'm a contrarian investor at heart, and I always enjoy scouring what "didn't" work during an investment year to determine whether these relatively cheap sectors or factors present an attractive opportunity, as contrarian investing can lead to outperformance. Second, we like to provide these contrarian ideas so that if a client asks you "What's cheap right now?" or "Are there any opportunities from last year?" you have interesting, well-founded ideas that can impress clients and prospects.	12/28/2021	KWEB: -14.77% CXSE: -13.21% GDX: 24.46% SIL: 1.20% XLU: 5.35% SPLV: -1.58%	SPY: -4.62%
<u>Practical Crypto Strategies for Clients</u> Greyscale Bitcoin Trust (GBTC) Amplify Transformational Data Sharing ETF (BLOK) ProShares Bitcoin Strategy ETF (BITO)	The push of cryptos into the cultural mainstream in 2022, along with substantial investment gains over the past several years, has resulted in a surge in interest in crypto exposure from investors. And, while there remains a lot of risks associated with crypto trading, the bottom line is that an advisor can only dissuade a client from cryptos for so long before it hurts the relationship. Given that, our goal in today's Alpha issue is to highlight some of the best and most responsible strategies to provide clients with crypto exposure without taking an overabundance of risk.	1/11/2022	GBTC: 2.23% BLOK: -9.21% BITO: 6.03%	SPY: -3.08%

<u>Weathering Market Volatility with "Quality" ETFs.</u> Quality Idea 1: Financials. First Trust Financials AlphaDex Fund (FXO). Quality Idea 2: Qualitative Value. ValueShares U.S. Quantitative Value ETF (QVAL). Quality Idea 3: Shareholder Yield. Cambria Shareholder Yield ETF (SYLD). Quality Idea 4: Core Value. Invesco S&P 500 Pure Value ETF (RPV).	This Alpha issue is an important complement to what we've been discussing in the regular Sevens Report, namely that we believe the best way to weather this increased volatility in markets is by allocating to "Quality" stocks, sectors, and ETFs. For us, "quality" means those stocks and ETFs with lower relative price-to-earnings (P/E) and price-to-book (P/B) ratios, strong free cash flow, and solid shareholder yield. We believe these stocks and sectors will be the most insulated from the effects of interest rate hikes, possibly slowing growth and other headwinds, and find themselves as high-quality landing spots for investment capital.	1/25/2022	FXO: 4.28% QVAL: 0.66% SYLD: 1.25% RPV: 3.52%	SPY: 2.73%
<u>Finding Value and Opportunity in International ETFs</u> Schwab Fundamental International Large Company Index ETF (FNDF). iShares Edge MSCI Intl Quality Factor ETF (IQLT). Vanguard International High Dividend Yield ETF (VYMI).	We've been talking a lot in the Sevens Report about wanting to allocate towards lower P/E sectors, and the fact is that quality international stocks in developed markets are currently trading at heavy discounts to the S&P 500. We think the combination of low valuations and less-aggressive central banks makes international exposure an important part of a diversified investment strategy going forward.	2/8/2022	FNDF: -2.29% IQLT: -3.06% VYMI: -1.92%	SPY: -4.74%
<u>What Would Outperform If Markets Turn Around?</u> SPDR FactSet Innovative Technology ETF (XITK) Vanguard Consumer Discretionary ETF (VCR) iShares Broad USD High Yield Corporate Bond ETF (USHY) SPDR Blackstone Senior Loan ETF (SRLN)	Today's issue was inspired by this thought: <i>What if everything works out alright?</i> Many analysts (including me) are concerned about numerous headwinds hitting the U.S. markets and a potentially volatile trading year. That opinion has been correct so far in 2022, and it's well-reasoned. But it's also a very popular view on the Street right now. So, in today's issue, we identify a playbook to outperform if, simply speaking, everything works out great!	2/23/2022	XITK: 9.81% VCR: 10.28% USHY: -0.38% SRLN: -0.21%	SPY: 7.88%
